

## ***Twin Fan Air Handling Units Bespoke Manufacture***

### **Applications**

- From 0.2m<sup>3</sup>/s to 0.7m<sup>3</sup>/s
- Used for Guaranteed 24hr Ventilation
- Run and Standby Fans

### **Construction and Design**

Ideally suited for toilet extract systems, where an automatic change over is available should a fan failure occur, to ensure continued operation.

The units can be roof mounted, or in the normal ceiling or service void for the duct mounted range.

A full range of electrical control panels are available to complete the product range.

Using CAD and CNC punching techniques, air handling units can be built of sheet steel construction.

Where required we work with OEM clients, or consultants manufacturing to supplied designs / drawings.

### **Technical**

Back draught dampers included  
Airflow detection switches  
Class O Insulation Available
